PO Box 1215,
BLACKWOOD S.A 5051

Steps To Follow

1. Send completed Application to The Breed Recorder in your State/Territory with a Copy of the Registered Pedigree and a Stamped Addressed Business Size Envelope. Your Rottweiler must be micro-chipped and a Copy of the Microchip Certificate is to be sent with the Application.
2. Arrange an appointment to have your dog x-rayed. Take along the paperwork. Make sure the Vet assesses the bite while the dog is awake. Counting teeth can best be done while the dog is under anaesthetic. **The Hip & Elbow X-ray must be taken under General Anaesthetic.** The x-ray plates, all the appropriate forms, must be identified with the microchip number and the ANKC Registration Number. Make certain that the Vet has completed all parts of the forms he/she is required to.
3. Send X-ray and completed paperwork to reader of your choice from the list (preferred Prof Wyburn, WA), together with payment of fees. Return the Dental and Eye Certificate to the National Breed Recorder as per the form.
4. Results from the Reader are sent to your Vet and a copy to the National Breed Recorder. The State Breed Recorder will eventually get copies and retain the copies.
5. The result is then listed in the National Hip Dysplasia Registers.

NOTE: The Hip x-ray and Dental and Eye examination can be done by any Veterinarian. It is possible to get a Specialist Eye Examination, although not compulsory.
